

JOB ADVERT

PROJECT MANAGER

Advance Your Engineering Career into Project Management!

Are you an engineer with a strong background in SCADA/PLC control and/or Functional Safety systems, eager to step into a leadership role? Cetix Ltd, a leading independent systems integrator, is seeking a proactive Project Manager to join our team in Rotherham. This is your opportunity to transition from engineering to project management, overseeing a diverse range of projects with varying levels of complexity.

ABOUT US

At Cetix, we pride ourselves on our flexibility and innovation, delivering cutting-edge technology and system solutions to meet the most demanding challenges. We work with blue-chip clients, offering a full project lifecycle service—from initial design to commissioning and support, encompassing software, hardware, and turnkey systems.

WHY THIS ROLE?

Leadership Development

Transition from engineering to managing complex projects, leading them from concept to successful delivery.

Diverse Projects

Manage a variety of projects, from straightforward to highly complex, ensuring no two days are the same.

Growth Opportunities

Be part of a company with ambitious growth plans, offering you the chance to develop and advance your career. Collaborative Environment: Join a supportive team where your contributions are valued, and your ideas can make a real impact.

Comprehensive Benefits

Enjoy a competitive salary, benefits package, and a commitment to work-life balance.

WHAT YOU'LL DO

- Lead and deliver a range of projects with varying complexity, ensuring they meet both customer expectations and company objectives.
- Allocate and manage resources effectively, keeping projects on track, within budget, and in compliance with safety and quality standards.
- Foster strong customer relationships, managing expectations and securing future business opportunities.
- Guide and support a team of engineers, helping them develop their skills and achieve project goals.
- Control project scope and costs, optimizing profits and managing customer relationships.
- Lead a team of skilled engineers, helping them develop and achieve project objectives.
- Ensure compliance with all legal, safety, and quality standards.

WHAT YOU'LL NEED

- A solid engineering background ideally involving some or all of the following SCADA, PLC Control, and Functional Safety Systems.
- A passion for stepping into a project management role and taking on the challenge of leading complex, multi-faceted projects.
- Strong communication, leadership, and problem-solving skills.

READY TO TAKE THE LEAD?

If you're an experienced engineer ready to advance into project management and lead diverse, impactful projects, we want to hear from you. Perhaps you have already taken the first steps into project management and are looking for your next opportunity. Join Cetix and take your career to new heights.

To Apply, please send you CV and covering letter/email to careers@cetix.co.uk
